SUBJECT INDEX TO VOLUME 6

Bubble flow in pressurized gas/solid fluidized beds, 285

Comparative size distribution and filter penetration measurements of DOP and corn oil aerosols, 207
Cycle optimization involving the use of filter aids, 243

Determination of the pore structure of porous materials using electrical conductance, 105
Distributions of the tangential velocities on the dust laden gas flow in the cylindrical cyclone dust collector, 17

Effect of complexing agents on the precipitation and removal of copper and nickel from solution, 441
Effect of particle size and parameter representation as an ion sink for aerosol reactions, 181
Effect of tartrate, a weak complexing agent, on the removal of heavy metals by sulfide and hydroxide precipitation, 421
Experimental investigation into the probabilistic nature of dust explosions, 43

Frequency of occurrence of dust explosions, 343

Heavy metals removal in a rapid infiltration sand column, 467

Immobilization of arsenic in coal combustion fly ash leachates, 393
Isothermal prediction of particle and gas flow in a coal-fired reactor, 53

Laser light scattering as a method of detecting and sizing particulates on smooth planar surfaces, 29

Measurement of solids concentration profile around the periphery of an immersed tube in a three-dimensional gas-fluidized bed, 145
Measurements of in-bed tube bundle erosion and particle-tube collision frequency in a gas fluidized bed, 269
Metal emissions from municipal solid waste (MSW) incinerators, 365
Methods for surface particle removal: a comparative study, 121
Mobilization and retention of mercury and lead from particulates co-disposed with municipal solid wastes, 381
Monitoring contaminant particles in gases: a review, 219

New approach to hydrodynamic interactions in polydisperse suspensions, 69
Numerical model for the turbulent fluctuation and diffusion of gas-particle flows and its application in the freeboard of a fluidized bed, 81

Particle size characterization of a jet mill product via principal component analysis, 95
Pressure changes at a sudden expansion in gas-solid flows, 333

Radioactive decay measurement of single microparticles in the electrodynamic balance: experimental aspects, 169
Reliability of minimum sample size for irregularly shaped fine particles, 305
Removal of cadmium (II) from dilute aqueous solutions by fungal biomass, 405
Research emphasis and needs for the environmental field in the 1990s, 359
Research on an aerodynamic particle separator (The EPS), 317

Selective removal of metals from wastewater using affinity dialysis, 483
Solid flow transition in liquid and three-phase fluidized beds, 133
Stresses in a rapid, simple shear flow of granular materials with multiple grain sizes, 1

Verification of morphological table based on probabilistic rough sets approach, 193
